Django, Flask, Bootstrap, Nginx,
Kafka

DB and Clouds: MySQL, MongoDB,
AWS, Azure, GG Cloud, FCI

Tools: Git, VSCode, Figma, Jupyter,
Postman, Docker, Ansible AWX,
Copilot

Duc Luu Van

Software Developer

ABOUT ME

Automation and backend engineer with 5+ years of experience developing scalable SaaS and RPA systems to optimize business operations. Skilled in building end-to-end automation solutions, backend services (Java Spring, Python FastAPI), and workflow orchestration with RPA technologies. Highly adaptable, continuously learning.

WORK EXPERIENCES

- Developer (Outsourcing)** 2024-Present
– FPT Software Innovation
 - **Project 1:** Designed, developed, and operated automation solutions for internal company processes and outsourced client projects.
 - **Project 2:** Led migration of automation workflows across multiple RPA platforms (e.g., UiPath, Blue Prism, Automation Anywhere).
 - **Project 3:** Operated RPA bot systems and servers, performed maintenance and change requests (CR).
 - **Project 4:** Designed and developed an administrative management web system using Python (Django framework).
 - Tech Stack:** UiPath, AutomationAnywhere, Python, Docker, Cloud, OpenAI
- Fullstack Developer (Production)** 2021-2024
– FPT Information System - akaBot
UBot Ecosystem (SaaS)
 - Developed and optimized the Ubot's automation and backend system for full-cycle invoice processing using RPA, Java Spring, and OCR technologies, ensuring robust data extraction, validation, and integration with client systems.
 - Clients:** FPT Software AF, TPBank, Eximbank, BIDV, BIC, Daikin, PTI, ...
 - Tech Stack:** RPA, JavaSpring, C#, Javascript, Python, Docker, Ansible, Agile

CERTIFICATES

UiPath Automation Developer Professional
UiPath, 2025

Top 1 – RPA Top Talent Contest TOEIC LR - 820
akaBot, 2023 ETS (IIG), 2023

Automation Anywhere Certified Advanced
Automation Anywhere, 2022
